Subject: FW: Health concern for work in TRW superfund

FYI, can you answer?

Thank you, Michael.

Subject: Health concern for work in TRW superfund

Hi Angie,

My office is located right above a superfund. I'm afraid that the office building air affects my health.

Do all the superfund tests pass for this office building? Is there any potential exposure, if working in this building?

Office address: 825 Stewart Drive, Sunnyvale, California, 94085, United States
Superfund info: <https://cumulis.epa.gov/supercpad/cursites/csitinfo.cfm?id=0901181>

Based on info from this link, human exposure is still **NOT** under control yet.
<https://cumulis.epa.gov/supercpad/SiteProfiles/index.cfm?fuseaction=second.Healthenv&id=0901181>

| Performance Measure | Status at this Superfund Site | What does this mean? |
|------------------------------|-------------------------------|---|
| Human Exposure Under Control | No | <p>Yes means assessments indicate that across the entire site:</p> <ol style="list-style-type: none">1. There are currently no unacceptable human exposure pathways; and2. EPA has determined the site is under control for human exposure. <p>No means an unsafe level of contamination has been detected at the site and a reasonable expectation exists that people could be exposed.</p> <p>Insufficient data means that, due to uncertainty regarding exposures, one cannot draw conclusions as to whether human exposures are controlled, typically because:</p> <ol style="list-style-type: none">1. Response to the contamination has not begun; or2. The response has begun, but it has not yet generated information sufficiently reliable to evaluate whether there are currently any unacceptable human exposure pathways at the site. |

Thanks,
Hongyan
